

Robotics

Why Robotics?

Creative thinking Not many fields of knowledge incorporate creativity and fun simultaneously. Studies have shown that robotics achieves both. In fact, students love to partake in activities in which they have full control, something that is possible with robotics. And when learners are able to do cool stuff, they want to develop more features.

What we do in Robotics?

- Obstacle Avoidance
- Reflection of Light
- Door Sliding
- Conveyor Belt
- Robotic Arm
- Visitor Counter
- Lunar Rover
- Smart Window
- ..and MANY MORE!!
