

Drones

Drones

Drones are more formally known as unmanned aerial vehicles (UAVs) or unmanned aircraft systems (UAS).

Essentially, a drone is a flying robot that can be remotely controlled or could fly autonomously through software-controlled flight plans in their embedded systems, working in conjunction with on board sensors and GPS.

What we do in Drones?

- Scratch Programming
 - Aero Modelling
 - Flying Stunts
 - Land, Air & Water Modes
- ..and MANY MORE!!
